

CA Anti-Spam 2007

CA Anti-Spam makes sure you get messages from people you know, while redirecting messages from people you don't. There are no complicated rules or filters to create or manage: CA Anti-Spam does it all for you. It works seamlessly with Microsoft Outlook and Outlook Express to stop unwanted spam and fraudulent phishing scams, letting you take control of your Inbox.

Comprehensive Spam Detection

Stop spam before it can compromise your PC and your privacy. CA Anti-Spam only allows messages from your approved senders to reach your Inbox – all other mail is quarantined for later review.

Based on the same award-winning capabilities that earned the PC Magazine Editors' Choice award three consecutive years (2003-2005), the whitelist technology in CA Anti-Spam effectively blocks unwanted email and protects against phishing attacks.

Free Updates, Upgrades, Support

With free protection updates, free upgrades to the latest product features, and free 24/7 online support, your one-year subscription ensures you're protected from the latest threats.

Easy to Use

Specifically designed to make spam protection simple and trouble-free:

- Scans your contacts folder and email folders during installation to create a list of approved people with whom you communicate
- Blocks unwanted spam by allowing only messages from your approved senders list to reach your Inbox – all other mail is quarantined for you to review later
- Automatically updates your list of approved senders as you send and receive messages, or as you periodically review and accept quarantined messages

System Requirements

- Windows 98SE, Me, 2000 or XP
- Microsoft Outlook 2000/2002/2003 or Microsoft Outlook Express 5.5/6.0 or higher
- One or more POP3 or MAPI email accounts
- 128 MB RAM
- 300 MHz or higher Pentium-compatible CPU
- 25 MB hard disk space

Required for All Installations:

- Internet Explorer 5.5 or higher
- Internet access

CA Anti-Spam 2007

Distinctive Features

- **Blocks Unwanted Spam** by allowing only messages from your approved senders list to reach your Inbox - all other mail is quarantined for you to review later
- **Prevents Phishing Attacks and Email Fraud** by automatically verifying the authenticity of messages, and displaying a clear visual warning on suspicious emails
- **Protects Multiple Email Accounts** for all of your Microsoft Exchange and any POP3 mail accounts you have configured in Outlook
- **Integrates Seamlessly with Microsoft Outlook/Exchange** with easy access to all features directly from the toolbar in Outlook and Outlook Express
- **Works Simply and Easily** no complicated content filters to set up or manage
- **Email Search** creates a search index of all information stored in Outlook, so you can quickly and easily find messages, attachments, contacts, appointments, journal entries and notes (*for English-language Outlook and Outlook Express only*)
- **Spam Score** helps determine which messages are most likely to be spam, resulting in less time reviewing quarantined mail, and less likelihood of missing a good email
- **New! Import/Export Approved Senders** allows you to easily migrate your list of approved senders from one PC to another
- **Supports Bonded Sender** allows mail from legitimate senders of commercial email (such as order confirmations from Amazon.com) to be delivered to your Inbox
- **International Language Support** automatically displays German, French, Italian, Spanish, Brazilian Portuguese, Chinese, Japanese and Korean based on your Windows language settings, and properly filters spam sent in any language
