

# CA Anti-Spyware 2007

Spyware can steal your credit card numbers and passwords. Switch your home page, or re-direct your web searches to unwanted sites. Display annoying ads, slow your PC to a crawl, or even control it remotely. CA Anti-Spyware (formerly eTrust® PestPatrol® Anti-Spyware) protects against a wide range of spyware threats that can expose your confidential information and diminish your PC's performance.

## Simple

- Install and that's all: you're protected by our programmed settings
- Perform tasks hassle-free using our simple interface
- Easily schedule automatic spyware scans, or do them on demand
- Get fast access to information that helps diagnose and resolve problems

## Advanced

- With quick scan times and efficient use of system resources, we don't bog down your PC
- The CA Security Advisory Team, a global network of rapid response centers focused on PC protection, detects and designs protection against spyware 24/7

## Automatic

- Our real-time protection never stops scanning for possible intruders
- We alert you whenever a suspicious program is attempting to install or launch
- We prevent outside access to your personal information and web activities
- We automatically download and install frequent protection updates
- Our scan results tell you the threat level of any spyware we detect, and allow you to link to the CA Spyware Information Center to learn more

## Free Updates, Upgrades, Support

With free protection updates, free upgrades to the latest product features, and free 24/7 online support, your one-year subscription ensures you're protected from the latest threats.

## System Requirements

- Windows 98SE, Me, 2000 or XP
- 256 MB RAM
- 300 MHz or higher Pentium-compatible CPU
- 25 MB hard disk space

## Required for All Installations:

- Internet Explorer 5.5 or higher
- Internet access

# CA Anti-Spyware 2007

## Distinctive Features

- **Improved! User Interface** offers simplicity and superior ease-of-use, helping you quickly and easily set preferences, check program status, and maintain a secure PC
- **Comprehensive Spyware Detection and Removal** provides comprehensive protection against a wide range of spyware, adware, keyloggers, browser hijackers and other threats
- **Improved! Real-time Spyware Protection** prevents and removes unwanted ActiveX controls, Browser Helper Objects and browser toolbars; prevents malicious changes to the Windows Hosts file, Registry, and Startup Programs list; and protects Internet Explorer settings including your home page, favorites, and search pages
- **Frequent Automatic Updates** help ensure you're always protected against the latest threats
- **Low System Overhead** with a total install of only 25 MB and low usage of system resources, CA Anti-Spyware installs quickly, saves hard drive space, and scans efficiently
- **Certified by Independent Testing Lab** West Coast Labs for effective spyware detection and removal
- **New! Secure Now** provides proactive protection by monitoring critical program functions and settings, and reminding you to keep your security at an optimal level
- **Detailed Scan Results** show the specific threat level of any spyware found, and allow you to link to the CA Spyware Information Center for more details
- **Scheduled and On-Demand Scanning** allow you to run a scan at any time, or schedule scans at pre-selected intervals to meet your needs
- **Custom Scans** allow you to select specific drives, files and folders to scan
- **File Exclusion List** allows you to exclude specific files and folders from scans
- **New! Threat Outbreak Warning System** provides real-time content feeds from the CA Security Advisor, giving you detailed, up-to-the-minute information on the most recent and most prevalent spyware threats
- **New! Quick Tips** provide you with helpful, at-your-fingertips answers to commonly asked questions, easing the burden of searching the Help file or contacting Support for assistance
- **Supported by the CA Security Advisory Team** our worldwide research labs work 24 x 7 to detect threats before they can damage your PC, helping to ensure protection from the latest threats
