

CA Anti-Virus 2007

If you're unprotected, viruses can invade in many ways - through email attachments, downloads, instant messages, and even web pages. From there, they can erase your files, damage your hard drive, and destroy the information you value most: photos, music, documents, and more. CA Anti-Virus provides complete protection against viruses, worms and Trojan horse programs.

Simple

- Install and that's all: you're protected by our programmed settings
- Perform tasks hassle-free using our simple interface
- Easily schedule automatic virus scans, or do them on demand
- Get fast access to information that helps diagnose and resolve problems

Advanced

- With quick scan times and efficient use of system resources, we don't bog down your PC
- The CA Security Advisory Team, a global network of rapid response centers focused on PC protection, detects and designs protection against viruses 24/7

Automatic

- We scan every inbound email attachment (Supports POP3 email accounts)
- We scan files whenever they're opened, saved to your computer, or closed
- Our early warning detection protects you from current and emerging threats
- Every day, we automatically update your signature files, the blueprints for specific new viruses
- Our real-time threat bulletin sends you information about the latest virus outbreaks
- If a specific threat is detected on your PC, we'll provide a link to the CA Virus Information Center so you can learn more about its risk level, how pervasive it is, and how to resolve it

Free Updates, Upgrades, Support

With free daily protection updates, free upgrades to the latest product features, and free 24/7 online support, your one-year subscription ensures you're protected from the latest threats.

- Windows 98SE, Me, 2000 or XP
- 256 MB RAM
- 300 MHz or higher Pentium-compatible CPU
- 25 MB hard disk space

Required for All Installations:

- Internet Explorer 5.5 or higher
- Internet access

CA Anti-Virus 2007

Distinctive Features

- **Improved! User Interface** offers simplicity and superior ease-of-use, helping you quickly and easily set preferences, check program status, and maintain a secure PC
- **Daily, Fully Automatic Updates** easily and effectively address the #1 reason PC users suffer attacks: out-of-date signature files
- **Low System Overhead** with a total install of only 25 MB and low usage of system resources, CA Anti-Virus installs quickly, saves hard drive space, and scans efficiently
- **Certified by Independent Testing Organizations** including ICSA Labs and West Coast Labs, and certified by Virus Bulletin to detect 100% of viruses "in the wild"
- **New! Secure Now** provides proactive protection by monitoring critical program functions and settings, and reminding you to keep your security at an optimal level
- **Automatic Email Scanning** protects against viruses that arrive via email, before they can cause damage
- **Scheduled and On-Demand Scanning** allow you to run a scan at any time, or schedule scans at pre-selected intervals to meet your needs
- **Real-time Scanning** proactively stops viruses by scanning files when they are opened, closed or saved to your PC
- **Advanced Heuristic Scanning** detects new threats even before virus protection updates are created
- **New! Threat Outbreak Warning System** provides real-time content feeds from the CA Security Advisor, giving you detailed, up-to-the-minute information on the most recent and most prevalent virus threats
- **New! Quick Tips** provide you with helpful, at-your-fingertips answers to commonly asked questions, easing the burden of searching the Help file or contacting Support for assistance
- **Interactive Virus Detection Messages** provide links to helpful resources in the CA Virus Information Center when threats are detected
- **File Quarantine** removes threats from their current location to a secure quarantine area to allow you to further review the file
- **File Exclusion List** allows you to exclude specific files and folders from scans
- **Archive Scanning** allows you to scan compressed files in a variety of formats
- **Supported by the CA Security Advisory Team** our worldwide research labs work 24 x 7 to detect threats before they can damage your PC, helping to ensure protection from the latest threats
