

CA Internet Security Suite 2007

CA Internet Security Suite 2007 provides comprehensive protection against viruses, hackers, identity thieves, spyware, spam, offensive websites, and other online threats that can jeopardise your privacy, your data, and your PC's performance. It combines easy-to-use, award-winning, business-strength technology with preconfigured settings and automatic updates that take the guesswork out of PC security.

Anti-Virus

If you're unprotected, viruses can invade in many ways - through email attachments, downloads, instant messages, and even web pages. From there, they can erase your files, damage your hard drive, and destroy the information you value most: photos, music, documents, and more. CA Anti-Virus provides complete protection against viruses, worms and Trojan horse programs.

Anti-Spyware

Spyware can steal your credit card numbers and passwords. Switch your home page, or re-direct your web searches to unwanted sites. Display annoying ads, slow your PC to a crawl, or even control it remotely. CA Anti-Spyware (formerly eTrust[®] PestPatrol[®] Anti-Spyware) protects against a wide range of spyware threats that can expose your confidential information and diminish your PC's performance.

Free Updates, Upgrades, Support

With free daily protection updates, free upgrades to the latest product features, and free 24/7 online support, your one-year subscription ensures you're protected from the latest threats. Local phone support included with all products.

Personal Firewall

Every PC connected to the Internet is a potential target for hackers and identity thieves. CA Personal Firewall protects your PC from both known and unknown threats, providing complete, business-strength hacker and privacy protection. It stops intruders, blocks malicious programs, and protects your personal information from identity theft.

Anti-Spam

CA Anti-Spam makes sure you get messages from people you know, while redirecting messages from people you don't. There are no complicated rules or filters to create or manage: CA Anti-Spam does it all for you. It works seamlessly with Microsoft Outlook and Outlook Express to stop unwanted spam and fraudulent phishing scams, letting you take control of your Inbox.

Parental Controls

The Internet is a fascinating place, full of valuable information. But as a parent, you need a good set of guidelines about where it's safe to go. Blue Coat[®] K9 Web Protection provides you with a family-safe web experience, where you control the Internet content that enters your home.

System Requirements

- Windows 98SE, Me, 2000 or XP
- 256 MB RAM
- 300 MHz or higher Pentium-compatible CPU
- 60 MB hard disk space

For Anti-Spam:

- Microsoft Outlook 2000/2002/2003 or Microsoft Outlook Express 5.5/6.0 or higher
- One or more POP3 or MAPI email accounts

For Parental Controls:

- Windows 2000 or XP
- 25 MB hard disk space

Required for All Installations:

- Internet Explorer 5.5 or higher
- Internet access

CA Internet Security Suite 2007

Distinctive Features

CA Internet Security Suite

- **Improved! User Interface** offers simplicity and superior ease-of-use, helping you quickly and easily set preferences, check program status, and maintain a secure PC
- **Low System Overhead** with a total install of only 60 MB and low usage of system resources, CA Internet Security Suite installs quickly, saves hard drive space, and scans efficiently
- **New! Secure Now** monitors critical program functions and settings, and reminds you to keep your security at an optimal level

Anti-Virus

- **Automatic Email Scanning** protects against viruses that arrive via email, before they can cause damage
- **Scheduled and On-Demand Scanning** allow you to run a scan at any time, or schedule scans at pre-selected intervals to meet your needs
- **Real-time Scanning** proactively stops viruses by scanning files when they are opened, closed or saved to your PC
- **Daily, Fully Automatic Updates** easily and effectively address the #1 reason PC users suffer attacks: out-of-date signature files

Anti-Spyware

- **Comprehensive Spyware Detection and Removal** provides complete protection against a wide range of spyware, adware, keyloggers, browser hijackers and other threats
- **Improved! Real-time Spyware Protection** prevents and removes unwanted applications, prevents malicious changes to Windows files and settings, and protects browser settings including your home page, favorites, and search pages
- **Detailed Scan Results** show the specific threat level of any spyware found, and allow you to link to the CA Spyware Information Center for more details

Personal Firewall

- **Pre-configured Security Settings** give you optimal protection right out of the box, and reduce firewall warnings for known programs
- **Ad Blocking** cuts out annoying pop-up and pop-under ads, letting you surf in peace
- **ID Theft Protection** alerts you when your personal information is about to leave your PC through the Internet or email, and allows you to block the transmission if desired

Anti-Spam

- **Blocks Unwanted Spam** by allowing only messages from your approved senders list to reach your Inbox - all other mail is quarantined for you to review later
- **Prevents Phishing Attacks and Email Fraud** by automatically verifying the authenticity of messages, and displaying a clear visual warning on suspicious emails
- **Integrates Seamlessly with Microsoft Outlook/Exchange** with easy access to all features directly from the toolbar in Outlook and Outlook Express

Parental Controls

- **Customisable Web Filtering Policy** allows you to create filtering rules that meet your specific needs by choosing from over 55 unique categories
- **Administrator Password Protection** allows you to set a password to block others from modifying settings or disabling the filtering function
- **Extensive Reporting Capabilities** offer detailed reports of all Internet activity, including all websites visited and blocked, the category ratings of the sites, and URLs of the sites visited
